

# CORPORATE OVERVIEW

We look forward to be regarded as the best and reliable source that delivers secure, leading edge technology to our customers.

## Who We Are?

**BTS** Bright Technology Solutions W.L.L was formed and established by a group of professionals with headquarters in Doha, Qatar. BTS provides superior consulting and implementation services using leading edge technologies that provide the utmost level of security. Our exceptional functional and technical expertise coupled with extensive industry knowledge makes us the ideal choice for a consulting firm to manage the implementation of your professional business needs.

## What is our Aim?

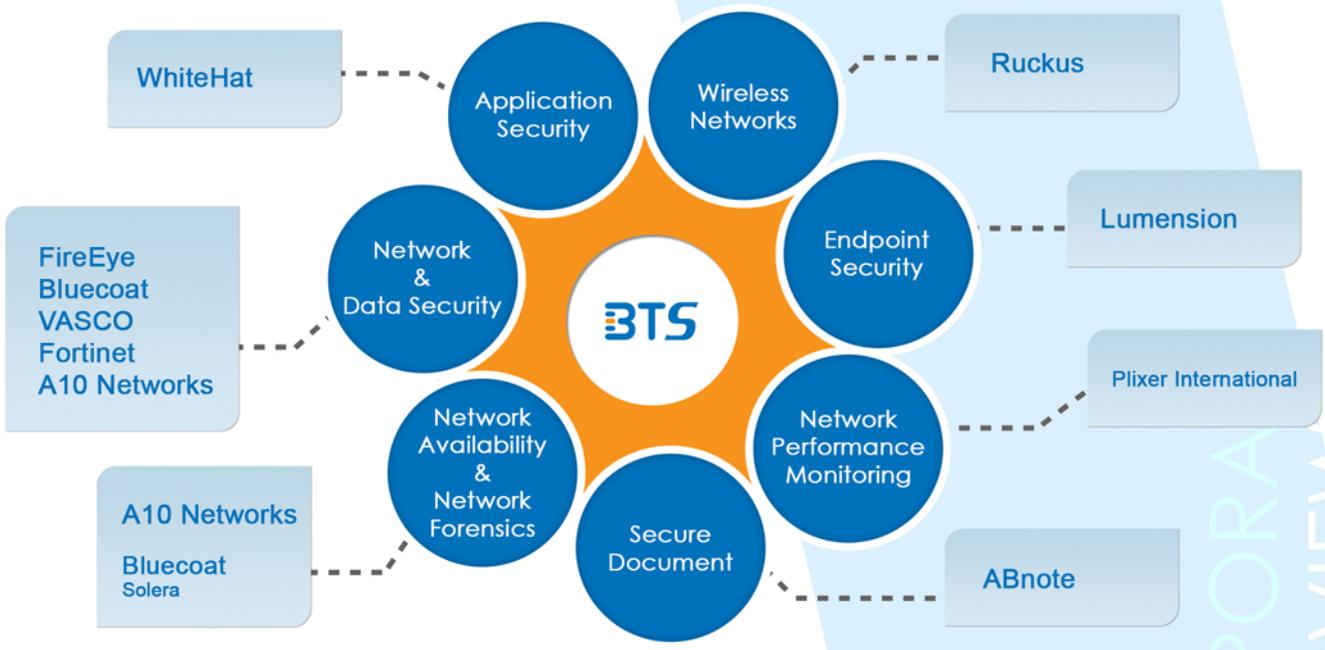

To be an irreplaceable and an essential business partner by gaining the trusted status as most valued bridge between our customers and technology.

To measurably contribute to the growth and security of our customers in a manner that is difficult to replicate or substitute, by providing unique, efficient, and secure leading edge technology solutions that meets their needs, and budget.

## What We Offer to our customers?

Professional and diversified IT security services and solutions through a network of expert consultants.

- Network & Data Security
- Cyber Forensic Solution
- Network Availability
- Network Performance Monitoring
- Endpoint Security
- Application Security

## BTS Added Values

We follow a distinct methodology- research, assemble and validate all the components for a comprehensive engineering plan that will meet and exceed your operational objectives. Our network professionals bring extensive field deployment experience to the table while evaluating your unique situation and assist you to plan your project and achieve your ICT goals.

**BTS is your way to approach all your Technological needs, gaining 100% success and the maximum ROI.**
